PROFESSIONAL SUMMARY

Product and marketing data analyst with **3 years** in iGaming (online casino and sports betting). I take analytics from the business question to the recommendation on my own: define metrics and tracking requirements, build data marts with data engineers, analyze funnels, retention, and monetization, and automate the work with **SQL**, **Python**, and AI tools. Built **Tableau dashboards** used by **40 stakeholders** across **20 teams**, automated **25 recurring reports**, and set up anomaly detection that flags issues within **24 hours**. Master's degree in Computer Systems Analysis (statistics, mathematical modeling).

CORE SKILLS

- Product analytics: funnels (registration to FTD), cohorts, retention, churn, LTV, monetization, player segmentation
- SQL (expert): complex joins, CTEs, window functions on **30M+** record datasets; data models and data marts in Snowflake
- Python (pandas) for data preparation, validation, statistics, and report automation; Git for versioning SQL and Python scripts
- A/B testing: design, statistical significance, impact on conversion, retention, and revenue
- BI: **Tableau** (SQL-backed dashboards for finance, product, and marketing; portfolio on Tableau Public), Looker Studio, Power BI, Excel, Google Sheets
- Metric definitions, event tracking requirements, and data quality checks; AI-assisted analytics workflows with validated output

PROFESSIONAL EXPERIENCE

Data Analyst, Canadian iGaming Company (under NDA)
Edmonton, Alberta, Canada | March 2026 - Present

- Built **SQL data models in Snowflake** and Tableau dashboards for finance, product, marketing, and operations, used by **40 stakeholders** across **20 teams**
- Automated **25 recurring reports** on financial and operational metrics, saving the team about **30 hours per week**
- Rolled out **Python-based and AI-assisted workflows** for data validation, SQL development, and exploratory analysis, cutting routine analytical work by **35%**
- Implemented **automated anomaly detection** for key financial and product metrics, surfacing data and performance issues within **24 hours** instead of several days
- Queried and analyzed datasets of **30M+ records** to find anomalies, behavioral patterns, and growth opportunities
- **Standardized and documented workflows** and onboarded **22 analysts** to the new tools and processes

Data Analyst, FAVBET Romania
Romania | April 2024 - February 2026

- Analyzed the registration-to-first-deposit funnel and player behavior; recommendations helped lift conversion by **22%**
- Designed and analyzed **A/B tests** for bonuses, CRM campaigns, and product changes, measuring significance and business impact
- Evaluated acquisition channels by ROI, CPA, and player quality, supporting budget reallocation that reduced CPA by **25%**

- Monitored **financial and operational KPIs** (deposits, withdrawals, GGR, NGR, revenue drivers) for a licensed online betting and casino operator; traced deviations in revenue and transaction data to their **root causes**
- Built and maintained the **KPI dashboards** that became the primary source of truth for marketing, product, CRM, and management (registrations, FTDs, deposits, GGR/NGR, retention, LTV)
- Automated recurring reporting with **SQL and Python** (plus Tableau, Excel, Google Sheets), cutting manual work by about **20 hours per week**

Freelance Data Analyst, Self-Employed

Edmonton, Alberta, Canada | September 2023 - March 2024

- Completed **20 analytics projects** for clients in e-commerce, digital marketing, and local services
- Cleaned and transformed messy multi-source datasets into reliable, analysis-ready tables with repeatable preparation workflows
- Analyzed customer behavior, conversion funnels, and campaign performance, helping clients cut wasted ad spend by up to **25%**
- Built Power BI dashboards and financial models in Excel and Google Sheets for ongoing reporting

EDUCATION

Master's Degree, Computer Systems Analysis, Dnipro University of Technology, Ukraine | 2015 - 2020
Systems analysis, databases, algorithms, mathematical modeling, and statistics.
